## **Dometic Launches New MasterFlush™ Toilets for Offshore Fishing Boats, Super Yachts**

### ***PROVEN TECHNOLOGY DELIVERS HOME-LIKE PERFORMANCE***

BIG PRAIRIE, OH – FEB 2006 – New **MasterFlush all-china electric macerating toilets** from Dometic Sanitation Corporation answer the growing demand for premium-quality electric toilets in boats where water consumption is less of a concern.

Three distinct MasterFlush models comprise the new SeaLand toilet line that fits a wide array of boat styles. Model 8812 features a small 9.8-inch x 9.5-inch (250 x 240 mm) footprint to accommodate even the tightest raised platform installations.

All MasterFlush low-profile and standard height models achieve enhanced user comfort with a full-size bowl and seat. The convenient electronic touchpad allows users to flush with either a “low” or a “normal” amount of water. It also lets users “empty” water from the bowl while underway or during cleaning.

All MasterFlush toilets maintain water in the bowl between flushes, eliminating odors that can escape up through the “dry” bowls of competitive brands. Most MasterFlush models also include a siphon-action trapway that pulls liquid out of the bowl the way household toilets do.

SeaLand 8800 series MasterFlush toilets are available in white and bone colors, in 12 VDC and 24 VDC models. Each includes a wall-mounted electronic touchpad for flushing operation, and a lighted status panel indicating “Tank Full” or “Power On” is also available.
